About P.K. University

P.K. University, established in 2016 and situated in Shivpuri (M.P.), is located 30 km away from the historic city of Jhansi, with the aim of meeting the educational needs of the Bundelkhand Region. It envisions a bright future for education in this region and boasts a 100-acre campus with well-developed infrastructure such as a library, auditorium, and computer centre.

The university has a rich collection of published journals authored by undergraduate, postgraduate, and Ph.D. students, as well as books published by our esteemed faculty. Furthermore, our faculty members have obtained patents, and the university operates a 300-bed hospital that offers free health check-ups.

We also provide legal aid services through the Faculty of Law, offer soil testing facilities, and disseminate climate information to local farmers in collaboration with the IMD (India Meteorological Department).

Moreover, we have allocated 25 acres of agricultural land for student use, promoting hands-on learning and research opportunities. As the institution continues to grow and evolve, it is poised to uplift Bundelkhand to new heights — empowering generations to come with knowledge, opportunity, and a brighter future.

Objectives :-

To create a learning environment where students can be socially conscious, disciplined, responsible and happy, as well as transform into inspiring leaders who can contribute to the progress of the society. And to promote new technology which can inspire to develop new innovation and adopt new technology in Bundelkhand. In which P.K. University is continuously making efforts to raise awareness regularly.

About Symposium

The innovative Symposium Aims to provide farmers with valuable insights from advisors of the India Meteorological Department (IMD), Ministry of Earth Sciences, Government of India. The event will emphasize the crucial role of timely meteorological data and weather forecasts provided by the IMD. Such information is a game-changer for agriculture, significantly enhancing production through informed decision-making.

The symposium will also serve as a platform for research and knowledge sharing, featuring informative paper presentations, engaging poster displays, and insightful newsletter sessions. The insights shared during the event have the potential to revolutionize farming practices by empowering farmers with critical weather information to optimize agricultural output.

Beyond knowledge exchange, the Symposium aims to strengthen collaboration between scientists, Agricultural experts, and farmers. By fostering interaction and mutual learning, the event aspires to bridge the gap between research and real-world application, ensuring that innovative solutions effectively reach the farming community for sustainable agricultural growth.

Past Symposium

P.K. University, in collaboration with **IMD**, has successfully organized six symposiums in the past on diverse themes.

28th February 2020

"Symposium cum Demonstration on Agro Meteorological Awareness and Its Importance and Application for Sustainable Development of Resources"

9th October 2020

"Symposium-cum Farmers' and Planners' Interaction on Achieving Targets of Soil and Water Conservation and Management"

23rd November 2021

"Applications of Rainwater Harvesting and Climate Change Parameters in Bundelkhand Region"

24th November 2022

"Implementation of Climate Change Parameters on PMKSY Natural Agriculture, Industrial and Pharmacy Development for ensuring sustainable water Resources Conservation"

24th & 25th November 2023

"Climate Change based on Agricultural, Pharmacy and Industrial Development"

28th December 2024

"Digital Development of Agricultural, Industrial & Pharmaceutical Technologies"

Present Symposium

Concept Note:-

The term globalization means international integration. It encompasses the openness of world trade, the development of advanced means of communication, the internationalization of financial markets, the growing importance of multinational corporations, population migration, and, in general, the increased mobility of people, goods, services, capital, data, and ideas. It is a process through which a diverse world is integrated into a single society. In essence, it is an attempt to establish the world as a global village. This is a new concept that has been gaining traction since the end of the Cold War and the disintegration of the Soviet Union at the end of the 20th century. The need for structural changes in various global economies, the dominance of market-based economies, the growing importance of private resources and capital, and pressure from other international organizations such as the World Bank and the International Monetary Fund have initiated this process in many developing countries like India. This has created new opportunities for developing countries. Improved access to foreign markets, technology transfer, improved productivity, and higher standards of living are some of the benefits of this process for countries like India. But it has also created new challenges, such as growing inequality within and between nations, financial market instability, and environmental degradation. Since India is an agricultural economy, it is wise to understand the impact of globalization on the Indian economy.

Sub Theme :-

- 1 - Financial Dimension of the strategic development of nanotechnologies in industry.
- 2 - Trends in Pharma Globalization.
- 3 - Global health as a challenge to socio-cultural development.
- 4 - Other .

“Impact of Globalization *on* Agriculture, Pharmacy *and* Industrial Development”
